DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Battersby (USP. 6,459,208).

Regarding claim1, Battersby disclose organic light emitting display device comprising:

- a set of scan line (18) (Fig. 1) formed by a cathode layer of the organic light emitting diode display device (Col. 2, Line 43&60);
- A set of data line (14) (Fig. 1) formed by anode layer of the organic light emitting diode display device (Col. 2, Line 43-56); wherein
- The scan lines (18) and the data lines (14) are overlapped to form pixel display areas (40 (Fig. 3) (Col. 2, Line 50), the scan line being formed in a selected layout such that those scan lines closer to a scan line electric source end have a greater width and those scan lines spaced from the scan line electric source end at a greater distance have a narrower width (Col. 2, Line 62) (Col. 3, Line 60) (Fig. 3).

Regarding claim 2, Battersby disclose that each of the display area includes an organic light emitting diode (Col. 2, Line 49) (Fig. 1).

Regarding claim 3, Battersby disclose that the data lines have a same width throughout

Prior art Battersby disclose active matrix electroluminescent display device.

Inquiry

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Chuc D Tran whose telephone number is (571) 272-1829. The

examiner can normally be reached on M-F Flex hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Don Wong can be reached on (571) 272-1834. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
